ASPIRING SOFTWARE ENGINEER

As an Aspiring Software Engineer, I am skilled in building scalable backend systems and web applications. Proficient in several programming languages, I am adept at utilizing frameworks and libraries to build innovative solutions. Passionate about continuous learning and delivering high-quality software through structured development approaches.

TECHNICAL SKILLS

Languages : C, C++, Python, JavaScript

Backend : Django, Restful API

Frontend : ReactJS, HTML, CSS, JavaScript

Libraries : NumPy, Pandas

Databases : MongoDB

Dev Tools : Git, GitHub, VS Code

Core Subjects : DBMS, OS, DSA

Soft Skills : Team Dynamics, Leadership, Time Management

INTERNSHIP EXPERIENCE

Software Engineer Intern 509 Army Base Workshop, Agra Cantt June 2026 – Present

- Worked on a Voice Control Rover project, contributing to voice-command-based control functionality.
- Assisted in day-to-day technical and operational activities within a defense-sector engineering environment.
- Gained exposure to professional work environments and industry-standard practices.
- Improved communication, teamwork, and problem-solving skills through cross-functional collaboration.
- Learned organizational workflow and technical documentation processes.

PROJECTS

Voice Control Rover

- Built an autonomous, voice-commanded rover that interprets spoken destination commands and navigates entirely offline, with no dependency on internet connectivity.
- Implemented offline map-based path planning to compute an efficient route, paired with real-time obstacle detection and avoidance for safe autonomous navigation to the destination.
- Software stack: Raspberry Pi 5, Python, ROS 2, LiDAR, GPS, and camera for navigation and perception; STM32 for hardware-level motor and control integration.

AI Resume Analyzer ReactJS, Python, Django, MongoDB, Git

[Source Code](#)

- Developed an AI-powered Resume Analyzer with a Django backend and React/Vite frontend, implementing resume upload, processing, ATS scoring, resume insights, and job-focused analysis through a modular full-stack architecture.
- Implemented AI-driven resume evaluation and skill-gap analysis to extract relevant candidate information, assess resume-job alignment, identify missing skills, and generate personalized recommendations for improving resume quality and ATS compatibility.
- Integrated Django-based backend services, MongoDB database persistence, media/file handling, and API communication with the React frontend, enabling users to submit resumes and interact with dynamically generated analysis and scoring results.

EDUCATION

Raja Balwant Singh Engineering Technical Campus, Agra Affiliated to Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Bachelor of Technology (B.Tech) — Computer Science & Engineering, Currently in 4th Year

2023 – 2027

CERTIFICATIONS

- Software Engineer Intern — Certificate of Accomplishment, HackerRank (June 2026)

ADDITIONAL INFORMATION

- Achievements: 5-Star rating in C Programming on HackerRank; regularly practices coding and problem-solving on competitive platforms.
- Strengths: Quick Learner, Problem-Solving Mindset, Task Ownership & Commitment.
- Languages: English (Professional), Hindi (Native).

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
